*****;  
*   Activity 3.03                                           *;  
*   1) Uncomment each WHERE statement one at a time and   *;  
*       run the step to observe the rows that are        *;  
*       included in the results.                          *;  
*   2) Comment all previous WHERE statements. Add a new   *;  
*       WHERE statement to print storms that begin with   *;  
*       Z. How many storms are included in the results?   *;  
*****;
```

```
.....  
proc print data=pg1.storm_summary(obs=50);  
    *where MinPressure is missing; /*same as MinPressure = .  
    *where Type is not missing; /*same as Type ne " "*/  
    *where MaxWindMPH between 150 and 155;  
    *where Basin like "_I";  
    where Name like "Z%";  
run;
```
