

```

*****;
*   Activity 6.02                                     *;
*   1) Complete the PROC EXPORT step to read the    *;
*   PG1.STORM_FINAL SAS table and create a          *;
*   comma-delimited file named STORM_FINAL.CSV. Use *;
*   &outpath to substitute the path of the output  *;
*   folder.                                         *;
*   2) Run the program and view the text file:      *;
*                                                    *;
*   SAS Studio - Navigate to the output folder in the *;
*   Navigation pane, right-click on storm_final.csv, *;
*   and select View File as Text.                  *;
*                                                    *;
*   Enterprise Guide - Select Open -> Other and     *;
*   navigate to the output folder. Select          *;
*   storm_final.csv and click Open. Click Cancel in *;
*   the Import Data window.                        *;
*****;
*   Syntax                                           *;
*                                                    *;
*   PROC EXPORT DATA=input-table                   *;
*               OUTFILE="output-file"              *;
*               <DBMS=identifier> <REPLACE>;        *;
*   RUN;                                             *;
*****;

```

```

proc export;
run;

```
