

```
*****;
*   LESSON 2, PRACTICE 1                               *;
*   a) Complete the PROC IMPORT step to read            *;
*   EU_SPORT_TRADE.XLSX. Create a SAS table named      *;
*   EU_SPORT_TRADE and replace the table               *;
*   if it exists.                                       *;
*   b) Modify the PROC CONTENTS code to display the    *;
*   descriptor portion of the EU_SPORT_TRADE table.   *;
*   Submit the program, and then view the output data *;
*   and the results.                                    *;
*****;
```

---

```
proc import ;
run;
```

---

```
proc contents data= ;
run;
```
