```
***********************************************************;
*  Activity 2.07                                        *;
*    1) Complete the OPTIONS statement to ensure that the *;
*       column names follow SAS naming conventions.      *;
*    2) Complete the LIBNAME statement to create a       *;
*       library named NP that reads NP_INFO.XLSX in the  *;
*       data folder.                                     *;
*    3) Highlight the OPTIONS and LIBNAME statements and  *;
*       run the selection.                               *;
*    4) Navigate to your list of libraries and open the  *;
*       NP library. Open each table and view the data.   *;
