```sas
 1 ***************************************************************;
 2 *   Activity 2.01                                           *;
 3 *   1) Modify the program to retain TotalRain and set the   *;
 4 *      initial value to 0.                                   *;
 5 *   2) Run the program and examine the results. Why are     *;
 6 *      all values for TotalRain missing after row 4?        *;
 7 *   3) Change the assignment statement to use the SUM       *;
 8 *      function instead of the plus symbol. Run the         *;
 9 *      program again. Why are the results different?        *;
10 ***************************************************************;
